

Patio Refurbishment & All Paving Maintenance

Case Study

Indian Sandstone Patio, Timperley, Greater Manchester

This beautifully kept, Indian Sandstone patio was being spoilt by the build up of ingrained dirt and grime, together with areas of unsightly algae and other green growth. Looking to bring this area back to its original condition, the homeowners did research on the web and found CR Services whom they approached and who were able to show them many successful references from satisfied customers, for whom they had carried out similar jobs in the area.

Impressed with what they saw, the homeowners employed CR Services to carry out the work. Using specialist cleaning product NCC Black Spot & Green Growth Remover, the team at CR Services soon had the natural Indian Sandstone slabs back to their pristine condition. A final application of patio sealer from NCC Streetscape finished the job. The patio is not only looking back to its original condition, but is in fact better as it can now be safely jetwashed without fear of failure.

The homeowners were delighted with the result and were quoted as saying that it was one of the best decisions that they had ever made! Having seen the results, one of their friends immediately booked CR Services to carry out a similar cleaning job on their patio.
